The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the IAEA's Member States and has the honour to draw their attention to the **International Conference on the Management of Spent Fuel from Nuclear Power Reactors: Learning from the Past, Enabling the Future** to be held at the IAEA's Headquarters in Vienna, Austria, from **24 to 28 June 2019**.

The purpose of the conference is to provide a forum for the exchange of information on national spent fuel management strategies, and on the ways in which a changing energy mix could influence these strategies and, in particular, on how they support the achievement of national energy goals.

Following the theme of the 2015 conference, this new conference aims to illustrate the positive impacts that an integrated approach to the back end of the nuclear fuel cycle has on the management of spent fuel from power reactors. It will consider the latest technological developments, as well as regulatory requirements and safety aspects.

The conference will also allow for the evaluation of advances in the management of spent fuel from power reactors to overcome current issues, and will identify expected future challenges and possible strategies for dealing with these.

The conference will be held in English.

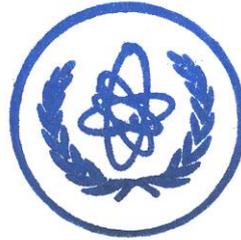

Member States are invited to disseminate the attached Announcement and Call for Papers to the target audience for the conference and to designate participants using Form A. Member States are strongly encouraged to identify suitable women participants.

The IAEA is generally not in a position to bear the travel and other costs of participants in the conference. The IAEA has, however, limited funds at its disposal to help meet the cost of attendance of certain participants. Upon specific request, such assistance may be offered to normally one participant per country, provided that, in the IAEA's view, the participant will make an important contribution to the conference.

Applications for financial support using Form C, as well as submissions of papers using Form B, can only be considered if received by the deadlines indicated in Section L of the Announcement and Call for Papers.

It should be noted that compensation is not payable by the IAEA for any damage to or loss of personal property. The IAEA also does not provide health insurance coverage for participants in IAEA events. Arrangements for private insurance coverage on an individual basis should therefore be made. The IAEA will, however, provide insurance coverage for accidents and illnesses that clearly result from any work performed for the IAEA.

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity to assure the IAEA's Member States of its highest consideration.
